Tides at Richmond Lock, 2022

Date (2022)	Low tide		High tide			Low tide		High tide			Low tide	
	time	ht LB	time	ht LB	ht AOD	time	ht LB	time	ht LB	ht AOD	time	ht LB

Notes

KEY TO COLUMN HEADINGS

time : predicted tide time at Richmond Lock
(local clock time, GMT or BST according to season, in 24-hour format)

ht AOD : predicted height of the tide at Richmond Lock in metres Above Ordnance Datum.
For further information on AOD heights, see thamestides.org.uk/AOD

ht LB : predicted height of the same tide at London Bridge relative to chart datum there.

For this Richmond Lock tide table, the predicted times and heights have been copied from the Port of London Authority's website, and are published here with their kind permission.

Note that the operation of the half-tide weir adjacent to Richmond Lock causes the river level upstream of the weir to be maintained at a minimum of 1.72 mAOD from about 2 hours after High Water until 2 hours before the next High Water. The timings may be varied if fluvial flow is particularly low or high.

Disclaimer *The times and heights presented in this table are predictions only, and in practice may be influenced by actual river flow and the weather. Richard Jennings does not accept any responsibility in law for the information in this tide table.*
